

DIRECT POWER TECHNOLOGIES, INC.

Providing Efficient Reliability

Introducing the 380VDC Common Slot Power Supply from HP

What's New?

“Extending the HP Common Slot Power Supply portfolio with a new 1200W 380VDC option that allows customers to integrate ProLiant servers into higher voltage DC data center infrastructures”

About Direct Power Technologies

Direct Power Technologies, Inc has the largest 380VDC server installation base and the longest history of working 380VDC servers in the United States. We are ready to help your company field 380VDC power servers
