## Cold Aisle Containment

Cold Aisle Containment consists of a physical barrier that allows the supply air to pool inside the aisle

- Recommended by the new ASHRAE TC 9.9 guidelines
- Creates a uniform and predictable airflow
- Eliminates hotspots
- Custom designs available

## Hot Aisle Containment

Hot/Cold aisle containment as offered by SubZero Engineering can double your CRAC/CRAH cooling capacity by raising the return air to the CRAC unit

- Eliminates hot and cold air mixing
- Works in both raised floor and slab environments
- Increases cooling capacity
- Saves Energy
- Improves data center cooling efficiency

## Artic Enclosures

SubZero's Artic Enclosures are the defacto standard in rack based air-flow management.

- All 5 airflow areas sealed
- EIA 310-D compliant
- Available handless push-to-open feature

- Assorted door styles available
  - Single full perforated
  - Split full perforated
  - Split solid

## Monitoring

The SubZero PolarXpress is a web based environmental monitoring system with real time PUE measurement.

The PolarExpress system allows you to monitor:

- Temperature
- Humidity
- Power usage effectiveness RCI

## Your Data Center Optimization Resource!
